

## **Technical spec sheet.**

So that Kurios can function effectively and smoothly it is important to take into account some technical needs.

### **Stage size:**

Width        30ft  
Depth        15ft

### **Power Requirements:**

For a full set up we need to have 8 separate 13amp power sockets on the same phase.

For a set up with out lights we need only 6.

### **Set up times:**

For a full set up we need 2 and half hours before the event to set up all the equipment.

For a set up with out lights we need 1 and a half hours. (Normally for assemblies etc)

### **Pack down times:**

We need at least an hour and half to pack down all the equipment after the performance is over.

### **Music Lessons**

We need our setup for our music lessons – so we advise bringing the classes to the hall (or classroom/drama room) where our gear is set up.
